GODIN GUITARS

Triumph electric guitar

Godin's Triumph electric guitar has a short-scale rock maple neck with a rosewood fingerboard. Like all Godin guitars, the Triumph features the company's Ergocut shaping technique, which bevels the edges of the fingerboard and frets for a comfortable playing experience. The Triumph has three Godin low-noise, single-coil pickups with a five-way switch, and features a fixed bridge with string-through design for improved sustain. The guitar is available in a natural finish with a solid mahogany body, and in brilliant sparkle finishes with a body that consists of a center block of silver leaf maple and poplar body wings. The Triumph comes with a deluxe gig bag.

List Prices: Sparkle models, \$599.00; Natural SG, \$549.00
